

Please postpone the June 2nd vote by the commission. As unelected stewards of the public airwaves, I feel the commission has not held an adequate number of public hearings nor has it actively sought public comments on this vital issue. I am greatly concerned about the proposed deregulation and it's affect upon the diversity of views that will have access to the airwaves. I hope the FCC will take into account the comments of the public , many of whom share my concerns. I would also encourage the commission to fully disclose all the details of the proposed rule changes.
